### Mainstreet Rod Company® - '27 Roadster Body

One piece body with full firewall, mounting flange and filled trunk.

Part #	Details	Price
MSR 2701	'27 Roadster Body	Call for Pricing

### Mainstreet Rod Company® - New "Stretched" '27 Lakester

A body designed as an alternative to the 23 "T" tub for a typical T bucket roadster or for the popular lakes roadster. The original Mainstreet body has been lengthened a total of 4 inches (2 inches in the doors and 2 inches in the quarters) for more roominess and comfort. This hand laid fiberglass body has two functioning doors available with a smoothie style for a custom look. Inner door panels are designed with pockets for hidden hinges. The rounded back looks great in the lakes mode or will accept our pickup beds and turtle decks. The full firewall has the traditional '27 shape to support a variety of windshield choices and the cowl vent hole is filled for a smooth custom look. *Body Only - See chassis section for our Lakester frame.*

### SouthWest Florida Rod-N-Kustom

#### 2" Chopped 1940 Ford Fiberglass Pickup Body Kit

Doors hung with hidden hinges and Bear Claw latches, tinted power door windows and rear cab window installed, interior garnish moldings, small block firewall, floor, and steel reinforcements behind dashboard and seat. Rear fenders, ribbed running boards, hood with steel reinforcement, front fenders w/built-in inner panels and grill shell. *Note: Bed and frame not included.*

#### Details

1940 Ford Pick-up Body Kit

#### Price

\$10,200.00

### BeBops Glass Works<sup>©</sup>

Be Bop's 1932 Hi-Boy Roadster has been specifically designed to meet the needs of Hot Rod builders both professional and novice. Features include mounted from the shop, doors and deck lid hinged, and a steel and oak internal support structuring that is just hard to find these days in a fiberglass Street Rod. The floorboard is fitted to match the frames of a '32, down to the very last curve.

Construction: Oak reinforced interior pieces for easier installation on interior. Steel reinforced 1" boxed tubing to alleviate body fluctuation. Steel plating in floor panel to strengthen the tightening of the body to the frame. Hidden hinges with working door latches for both doors. Hinged deck lid, custom firewall, smooth floor, and reinforced core mat floor & body panels.
